

## PRESS RELEASE 13/18

### ■ OVERALL SITUATION OF UNDERTAKINGS FOR COLLECTIVE INVESTMENT AND SPECIALISED INVESTMENT FUNDS AT THE END OF FEBRUARY 2013

#### I. Overall situation

As at 31 March 2013, total net assets of undertakings for collective investment and specialised investment funds reached EUR 2,528.920 billion compared to EUR 2,468.070 billion as at 28 February 2013, i.e. a 2.47% growth over one month. Over the last twelve months, the volume of net assets increased by 14.06%.

The Luxembourg UCI industry thus registered a positive variation amounting to EUR 60.850 billion in March. This increase represents the balance of positive net issues of EUR 22.215 billion (+0.90%) and a positive development in financial markets amounting to EUR 38.635 billion (+1.57%).

The number of undertakings for collective investment (UCIs) and specialised investment funds (SIFs) taken into consideration totalled 3,854 as against 3,866 in the previous month. A total of 2,483 entities have adopted an umbrella structure, which represents 12,154 sub-funds. When adding the 1,371 entities with a traditional structure to that figure, a total of 13,525 entities are active in the financial centre.

As regards, on the one hand, the impact of financial markets on Luxembourg UCIs and, on the other hand, the net capital investment in these UCIs, the following can be said about March.

Most equity UCI categories recorded price increases at the end of March, with the exception of Eastern European equity UCIs. The European equity UCIs could only realise slight price increases because of the Cyprus crisis whilst the American and Japanese equity UCIs recorded significant increases. The increase in the American and equity UCIs was due, in particular, to a political agreement reached in the United States on the postponement of budgetary cuts while the increase in the Japanese equity UCIs resulted mainly from the announcement of a programme on the economic situation and the continuation of monetary easing in Japan. The global market of equity UCIs was supported by these positive developments in the United States and in Japan.

In March, the equity UCI categories registered an overall positive net capital investment.

\* Variation in % of Net Assets as compared to the previous month

A decrease in the yields of highly rated public debts of euro area countries was recorded for EUR-denominated bonds in response to the events in Cyprus. On the private sector bond market, a once again heterogeneous development by sector and by country resulted, on average, in price increases. In sum, EUR-denominated bond UCIs recorded overall price increases during the month of March.

USD-denominated bonds recorded a positive development of the prices in March due, inter alia, to the USD appreciation against the EUR of 2.53%. In respect of the US-government bonds, a slight fall in yields was observed in relation to the maintenance of the expansive monetary policy measures in the United States.

In respect of emerging market bonds, the risk premiums slightly increased in March. However, this trend was offset by the appreciation of the main currencies of the emerging countries against the EUR so as to entail a price increase.

Overall, fixed-income UCIs showed a slightly positive net capital investment during the month under review.
