

PRESS RELEASE 13/41

■ GLOBAL SITUATION OF UNDERTAKINGS FOR COLLECTIVE INVESTMENT AND SPECIALISED INVESTMENT FUNDS AT THE END OF AUGUST 2013

I. Overall situation

As at 31 August 2013, total net assets of undertakings for collective investment and specialised investment funds reached EUR 2,498.839 billion compared to EUR 2,523.186 billion as at 31 July 2013, i.e. a 0.96% decrease over one month. Over the last twelve months, the volume of net assets increased by 8.86%.

The Luxembourg UCI industry thus registered a negative variation amounting to EUR 24.347 billion during the month of August. This decrease results from the positive net issues of EUR 0.105 billion (+0.00%) combined with the negative development in financial markets amounting to EUR 24.452 billion (-0.97%).

The number of undertakings for collective investment (UCIs) and specialised investment funds (SIFs) taken into consideration totalled 3,894 as against 3,884 in the previous month. A total of 2,514 entities have adopted an umbrella structure, which represents 12,203 sub-funds. When adding the 1,380 entities with a traditional structure to that figure, a total of 13,583 entities are active in the financial centre.

As regards, on the one hand, the impact of financial markets on Luxembourg UCIs and, on the other hand, the net capital investment in these UCIs, the following can be said about August 2013:

The various UCI categories dealt with price losses notably owing to the tensions in Syria and the threat of military action, as well as to the anticipations of an imminent reduction in bond buying by the US Federal Reserve.

The intensity of the downward trends on the equity markets was not uniform throughout the various equity UCI categories. Thus, European and US equity UCIs recorded less important decreases notably as a result of more favourable economic data. However, Asian and Latin American equity UCIs suffered more significant price losses, notably due to the depreciation of most emerging market currencies. Japanese equity UCIs also recorded a negative variation, following weaker growth of the GDP despite the "Abenomics" strategy based on an accommodating monetary policy and economic programmes aiming to stimulate the Japanese economy.

In August, equity UCI categories registered an overall positive net capital investment.

* Variation in % of Net Assets as compared to the previous month

As regards EUR-denominated bond UCIs, favourable economic data brought about a growth in the yields of high-rated public bonds. The resulting fall in prices was partly offset by an increased demand for these bonds following a growing risk aversion of investors under the threat of military action in Syria. This downward trend in the prices of high-rated government bonds had a ripple effect on private bonds, whose prices have dropped slightly. Overall, EUR-denominated bond UCIs recorded price increases during the month under review.

As regards USD-denominated bonds, the anticipated reduction of the Federal Reserve's asset purchase programme generated a rise in interest rates of US government bonds. As a result, this category of bonds suffered a fall in prices, mitigated by a growing demand for these bonds following the situation in Syria.

As far as emerging market bond UCIs are concerned, the US Federal Reserve announcing the reduction of its asset purchase programme put pressure on the prices of emerging market bonds as well as on their currencies, affecting primarily the countries that face a significant current account deficit. As a consequence, the prices of this UCI category fell.

In August, bond equity categories registered an overall slightly positive net capital investment.
