

## PRESS RELEASE 10/11

### ■ GLOBAL SITUATION OF UNDERTAKINGS FOR COLLECTIVE INVESTMENT AND SPECIALISED INVESTMENT FUNDS AT THE END OF APRIL 2010

#### I. Overall situation

As at 30 April 2010, total net assets of undertakings for collective investment and specialised investment funds reached EUR 2,012.887 billion compared to EUR 1,980.538 billion as at 31 March 2010, i.e. a 1.63% growth over one month. Over the last twelve months, the volume of net assets increased by 26.36%.

Overall, the Luxembourg UCI industry registered a positive variation amounting to EUR 32.349 billion during April. This positive variation is composed of EUR 18.546 billion (+0.94%) resulting from the positive impact of the financial markets and EUR 13.803 billion (+0.70%) originating from positive net issues.

The number of undertakings for collective investment (UCIs) and specialised investment funds (SIFs) taken into consideration totalled 3,521 as against 3,516 in the previous month. A total of 2,158 entities have adopted an umbrella structure, which represents 11,189 sub-funds. When adding the 1,363 entities with a traditional structure to the previous figure, a total of 12,552 entities are active in the financial centre.

On the European equity market, the publication of positive economic data was overshadowed in April by the negative impact of the discussions concerning the public finance of some Member States. As a consequence, European stock exchange indexes and European equity UCIs declined during the month of April.

On the US equity market, the publication of promising economic data, in particular as concerns employment, allowed ending up the month with positive figures.

In short, equity UCIs registered positive net issues in April.

Latin American equities	1.57%	0.16%
Other equities	1.05%	0.86%

\* Variation in % of net assets as compared to the previous month

On European bond markets, the discussions mentioned above contributed to widen the gap of the return of these bonds, depending mainly from the issuing countries.

In total, bond UCIs denominated in EUR did not suffer major changes in their net assets in April.

On the US government bond market, the anticipation that interest rates would be kept at a low level in the medium-term and the trend of investors to focus on sound issues have also had a slightly negative impact on the return of these bonds. Bond UCIs denominated in USD were also positively impacted by financial markets and realised a positive capital investment.

On the currency markets, the USD appreciation as compared to EUR of 1.2% had a positive impact on the net assets of the Luxembourg UCIs investing in USD-denominated securities.

## Development of fixed-income UCIs during the month of April 2010\*
